Summary

Full Stack Developer with strong expertise in React.js and modern web technologies. Proven track record in developing responsive, high-performance applications with focus on user experience. Experience in implementing RESTful APIs, authentication systems, and working with cross-functional teams. Passionate about delivering scalable solutions and staying current with emerging technologies in web development.

Technical Skills

Frontend - React.js (v17+), TypeScript, HTML5, CSS3, Redux, Jest

Backend - Django, RESTful APIs, JWT Authentication

Tools & Version Control - Git, Postman, Swagger, Docker

Build Tools - Webpack, Babel, npm, yarn

Experience

Circleup AG

Lead Full Stack Engineer

December 2023 – July 2024

Zurich, Switzerland

Responsibilities:

- Architected and implemented scalable React.js components and reusable front-end libraries, resulting in 40% faster development cycles and improved code maintainability.
- Led the implementation of JWT-based authentication system and RESTful API integration, ensuring secure and efficient data communication between front-end and back-end services.
- Conducted regular code reviews and established best practices for the front-end team, improving code quality and reducing technical debt.

Environment: React.js, TypeScript, Redux, RESTful APIs, Jest, Git

Cedzlabs

Full Stack Developer

March 2023 – July 2024

India

Responsibilities:

- Developed and maintained complex web applications using React.js and Django, focusing on performance optimization and cross-browser compatibility.
- Implemented responsive UI components and integrated them with backend services through RESTful APIs, improving user experience and application efficiency.

Environment: React.js, Django, TypeScript, RESTful APIs, Git

Projects

Enterprise Data Analytics Platform | React.js, Django, TypeScript

2023

Description:

- Developed a comprehensive data analytics platform using React.js and Django, featuring real-time data visualization, custom reporting tools, and integration with multiple data sources. Implemented JWT authentication and optimized front-end performance using Redux state management.

Tools: React.js, Django, TypeScript, Redux, JWT, RESTful APIs

Component Library & Design System | React.js, TypeScript

2023

Description:

- Created a reusable component library with comprehensive documentation using React.js and TypeScript. Implemented automated testing using Jest and established CI/CD pipelines for seamless integration.

Tools: React.js, TypeScript, Jest, Git, CI/CD

Achievements / Professional Development

- Implemented Agile development practices, leading to 30% improvement in project delivery times.
- Contributed to open-source React.js projects and component libraries.
- Regular participant in web development conferences and workshops focusing on React.js and modern web technologies.

Strengths: Problem-solving, attention to detail, team collaboration, and adaptability to new technologies.
