Projects

E-Commerce Platform | MERN Stack

2023

Description:

- Developed a full-stack e-commerce platform using MongoDB, Express.js, React, and Node.js. Implemented features including user authentication, product catalog, shopping cart, and payment integration. Utilized Redux for state management and implemented responsive design using CSS3 and Bootstrap.

Tools: MongoDB, Express.js, React.js, Node.js, Redux, Bootstrap

Task Management System | Python, Django, React

2023

Description:

- Created a full-stack task management system with real-time updates using Django REST framework and React. Implemented user authentication, task creation/assignment, and progress tracking features. Deployed using Docker and AWS.

Tools: Python, Django, React, PostgreSQL, Docker, AWS

Achievements / Certifications

- AWS Certified Developer Associate
- Led a team of 5 developers in implementing a major feature release, completed 2 weeks ahead of schedule
- Reduced application load time by 50% through optimization of database queries and frontend caching

Strengths: Problem-solving, Team collaboration, Technical leadership, Agile methodologies

Languages: Telugu - Native | English - Fluent | Hindi - Fluent | German - Intermediate
